

The CX-DSP107 is a pendant sound projector with a built-in 70/100 volt transformer. The 70v/100v transmission operates in a high-voltage, low-current mode, allowing for greater distance transmission and parallel connections of many loudspeakers. This speaker is built with a wide frequency response (110-18,000Hz). It is composed of high-quality industrial plastic, light in weight, long-lasting, and will never fall out of shape or fade; The hanging style and suspensory are both adjustable. Driver surround has good damping, a long lifespan, and produces clear and thunderous tones. It can be used in a variety of settings with varying area sizes and background noises, including stations, parks, schools, squares, military camps, and industrial parks.

SPECIFICATIONS

Model	CX-DSP107	Voltage	70/100V
Rated Power	15W	Style	Hanging style and the suspensory is adjustable
Sensitivity	91±2dB	Transformer	Built-in 100v/70v
Max. SPL	102±2dB	Material	High Quality Industrial Plastic
Frequency Response	110Hz-18kHz	Weight	2kg
