

The CX-DSP602 (NEW) 6w ABS ceiling speaker is a built-in 70v/100v transformer ceiling speaker. 70v/100v transmission is realised in high voltage, low current mode, which allows for greater transmission distances and parallel connection of numerous speakers. The speaker is designed for broadband response (89–20,000Hz). Made from high-quality engineering plastics to assure longevity, never deforms, and never fades; Its dual crossover architecture and flush mounting design make installation straightforward and safe. The driver surround damping is superb, long-lasting, and produces clear and strong sound. It can be used in a variety of settings with varying sizes and background noise, including stations, parks, schools, squares, military camps, and industrial parks.

## SPECIFICATIONS

<b>Model</b>	DSP6011
<b>Type</b>	6.5 inch Frameless
<b>Grille Material</b>	Aluminum
<b>Frequency Response</b>	110Hz - 15kHz
<b>Cutout Size</b>	Ø165-170mm
<b>Installation</b>	In-ceiling quick installation by spring clip

<b>RMS Power</b>	6W
<b>Power Input</b>	70V/100V
<b>Max. SPL</b>	97±2dB
<b>Sensitivity</b>	90±2dB
<b>Dimension</b>	Ø165-170mm
<b>Net Weight</b>	0.6kg
