

The CX-DSP7011 is a surface-mount ceiling speaker with a 70v/100v transformer built in. The 70v/100v transmission operates in a high-voltage, low-current mode, allowing for greater distance transmission and parallel connections of many loudspeakers. It has a sturdy clip for easy installation and is composed of high-quality engineering plastic that is durable, non-deformable, and does not fade. It is an excellent choice for venues like schools, gymnasiums, square halls, parks, parking lots, railway stations, airports, villa communities, and mall supermarkets, among others. It includes a 70v/100v transformer. The 70v/100v transmission operates in a high-voltage, low-current mode, allowing for greater distance transmission and parallel connections of many loudspeakers. It has a sturdy clip for easy installation and is composed of high-quality engineering plastic that is durable, non-deformable, and does not fade. It is perfect for a variety of settings, including schools, gymnasiums, square halls, parks, parking lots, train stations, airports, villa communities, and mall supermarkets.

## SPECIFICATIONS

<b>Model</b>	DSP7011
<b>Type</b>	6.5 inch Frameless
<b>Grille Material</b>	Aluminum
<b>Power</b>	Big power design (6-10W)
<b>Frequency Response</b>	120Hz - 16kHz
<b>Cutout Size</b>	Φ165mm - Φ170mm
<b>Installation</b>	Equipped with clamps for installation

<b>RMS Power</b>	10W
<b>Power Input</b>	70V/100V
<b>Driver Unit</b>	6.5 inch
<b>Max. SPL</b>	97±2dB
<b>Sensitivity</b>	90±2dB
<b>Dimension</b>	Ø165-170mm
<b>Net Weight</b>	0.6kg
