

Curtain motor is mainly used for horizontal curtain, which is widely used in hotel rooms ,office and flat. Motorized curtains are not only part of the decoration they bring your home to life.

With Connex curtain motor solutions, you have the freedom to create the right ambience with just a simple touch of the remote control.

DESCRIPTION

- Silent Design
- AC 110~240V, sound insulation is adopted to reduce noise, which makes the noise less than 35dB
- Soft Start and Stop Function
- Curtain motor with light open and light close function. When it starts and nears the limit position, the speed will obviously slow and make the curtain running more elegantly.
- Electronic Memory Limit Function
- This motor with electronic limit, no need to set the limit position by hand, it greatly shortens the debugging time. The electronic limit function can automatically delete the limit difference of each day and keep the precise limit position for a long time.
- Built-In Receiver Function
- Misdar curtain motor is endowed with built-in receiver function. Curtain can be controlled by remote for separately or in a group system.
- Resistance And Stop Function
- When you pull the opening or closing curtain, it will automatically stop to protect the curtain from resistance.
- Light Touch-Start Function
- If use hand to pull the curtain lightly, the curtain will run automatically and stop until fully opened or fully closed.
- Power Off Manual Function
- When the power is off, just do as we do to a common manual operated curtain, we can lightly pull the curtain to open and close.
- Smarthome Connection
- Connect with smart home system to achieve smart control.
- Compatible And Multi-function
- Compatible to various control systems, such like smart home control system and RS232 RS485, Infrared.
